

# Shopi-fy

By: Emerson Jade U. Picazo

### ===Rationale===

In the present age, e-commerce is highly useful, we buy and sell goods over the internet. Shopi-fy is a e-commerce platform. It offers new and affordable product that everyone can shop and sell their goods. Whoever has access or login this website will be notified, especially on the changes to the website and new product be released.

However, the main focus of this platform is to reach new markets and increase sale and revenue, as well as customer can spend less time for hopping for what they want and offered affordable product and price comparison.

This idea, I made it for everyone whether it is a mall or big business, for them to promote their products and service.

Shopi-fy supported payment method that are available on checkout like; online payment, cash on delivery, credit (debit) card, payment center/e-wallet.

### == General and specific objectives==

The general objective of this project is to create a useful and working e-commerce platform that everyone can access the website. Which helps their business and everyone will be able to select and add comments or feedback.

The specific objectives of this platform is to offer good quality of product, not only product but good seller and payment method for the customer satisfaction. And everyone can access this website

## ===FEATURES ===

Side Shop is aiming to develop these features:

### Home

Where are the all items or products to be seen with their prices and quantities and other information about the items or product.

### User account

This is where the information of the customers, also there will the customers can see under the user account is the items or product that they purchase, and also my wallet, my likes, recently viewed, ratings, account settings and help center.
